

Craters activity material list

This activity is done with common household objects. Students should have:

Round objects of variable sizes and masses:

- Fruits (apples, grapes, cherries, lemons, etc.)
- Sport balls (tennis, soccer, baseball, etc.)
- Aluminum foil (good for making different sizes!)
- Modeling clay balls
- Coins

Something in which to drop the objects to observe the size and depth of the crater or hole that they form:

- Plastic tub filled with sand, dirt, soil, or rice
- Folded blanket
- Pillow
